

Regina Carey has been only on our board for a short time but has been helping with our conferences for many years. She has been instrumental in getting speakers that are relevant for the attendees as well as doing presentations that involve the participants and inform them of various ways to work and counsel students with LD and ADHD.

Since becoming a board member she has volunteered at the office, working on the computers and helping with the program book and the newsletter (proof reading and contacting persons to write articles).

She also comes in with one of her children and many, many cleaning products to clean the office from time to time. Something I never get around to doing and we do not have a cleaning service.

Regina will be our new SEAC (Special Education Advisory Committee) representative.

She has taught in special education for and has been a Field Instructor at Michigan State University. For the last 15 years she has been coaching teenagers and adults with invisible disabilities.
